Version 3.0: Package/Materials Recycling & Sustainable Packaging A Compendium Series of Global Statistics & Forecasts for the Informed Packaging Executive

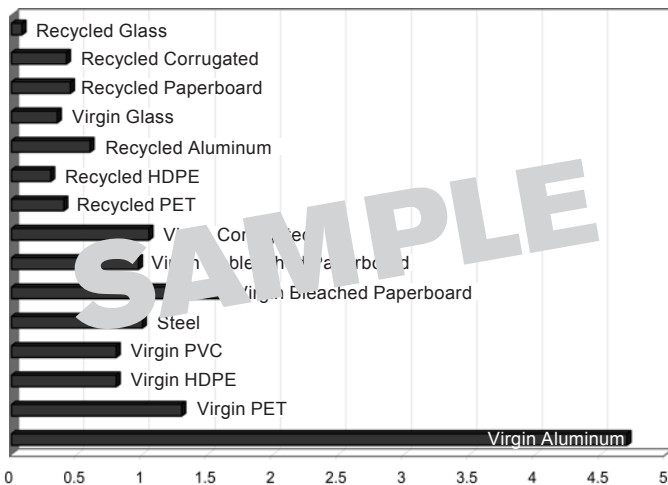

Packaging By The Numbers 3.0: Package Recycling & Sustainability, is the third in the best-selling *Packaging By The Numbers* compendium series of global packaging data resources. *Version 3.0* offers a detailed snapshot of the global package recycling picture across glass, metal/aluminum, paper/board, and plastic packaging. It also includes the newest data on such topics as sustainable/renewable-resource-based packaging, including biopolymer production and usage forecasts, and by-material production energy use.

This indispensable – and inexpensive – PDF-only publication includes more than 50 easy-to-read, full-color charts, tables, and graphs. It delivers the most current data available on the global package recycling and sustainable/renewable-resource-based packaging marketplace. Its electronic format enables busy packaging professionals instant access to critical information and data that will guide them in their strategic decision-making process.

Data That Will Support Strategic & Production Planning, Including:

- Metal, Glass, Paper/Board, & Plastics Recycling Trends
- Package Units Produced Vs. Recovery, Waste & Recycling Rates
- U.S. & Global Demand for Bio-based Packaging Materials
- Energy Use Requirements To Produce Packaging Materials
- The Connection Between Organic Foods/ Beverages & Renewable Packaging Materials
- Consumer Attitudes Toward Packaging & The Environment
- Post-Consumer PET Bottles Purchased for Recycling

U.S. Recycling Rate Percentage of Packaging Materials Produced/2005

Base Package Material Cost Per Ton To Produce & Dispose

Material	Production	Environmental Cost		Total
		\$/ton material		
		Production	Disposal	
Virgin Corrugated Box*	210		2	212
Recycled Content Corrugated Box	151			153
Virgin Aluminum	33			38
Recycled Content Aluminum	3			86
Virgin Glass	5			56
Recycled Content Glass	5		1	
Virgin HDPE	292		4	296
Virgin PET	854		4	858
Virgin PVC	5,053		4	5,507

Section 1. Packaging & Materials Recycling

- Aluminum Can Reclamation 1995 – 2005
- PET Bottle Recycling Rates 1995 – 2005
- HDPE Beverage Containers Sold & Recycled 1996 – 2006
- Glass Beverage Bottle Waste Rates 1996 – 2006
- Paper/Paperboard Collection Techniques By Percentage
- Growth of Recycled Plastics in the U.S. 1990 – 2004
- U.K. Recycling Rates By Material Type 1998 – 2005e

Section 2. Sustainability & Sustainable/Renewable

- Packaging Worldwide BioResin Capacity 1990 – 2008
- Projected Sales of Bioplastics in Europe Through 2015
- Demand for Biodegradable Packaging Plastics
- Firms Producing Corporate/Social Responsibility (CSR) Reports

Section 3. Packaging Economics & Energy

- Comparative Package Raw Material Cost Trends 2001 – 2006
- Base Package Material Cost Per Ton To Produce & Dispose
- Energy Use Required To Produce Packaging Materials
- Greenhouse Gas Emissions Per Gram of Packaging Material Produced

Section 4. Packaging & Organic Foods/Beverages

- Organic Food/Beverage Products Introduced By Package Material Type (Including Bioplastics) 2002 – 2005
- Organic Food/Beverage Products Introduced Globally By Package Format Type 2002 - 2005

Section 5. Consumer Attitudes

- Segmentation of U.S. Population Concerned About Environmental Issues
- Consumers' Threshold For Paying More At Retail for Packaging Made of Compostable Polymers

*Packaging By The Numbers 3.0: Package Recycling & Sustainability includes more than 50 charts, graphs, & tables
