

Call for Nominations!

2010 Quality Plant OF THE YEAR

“Quality” plants deserve special recognition. That’s why *Quality Magazine* is presenting its 2010 *Quality Plant of the Year Award*.

The award is open to manufacturing plants in the United States. The plant must be involved in making and measuring, testing or inspecting discrete parts. We’re looking for plants that have applied world-class quality technology, equipment, services and techniques that result in reducing scrap, rework, warranty or manufacturing costs, improve productivity or cycle time, increase capacity or improve adherence to quality standards.

Quality Magazine’s Plant of the Year award recognizes both a small plant of 250 or fewer employees and a large plant of more than 250 employees for its outstanding achievements in quality.

Anyone can nominate a plant—employees, suppliers and casual observers are welcome to make submissions. **Deadline for nomination forms is November 2, 2009. All nomination forms MUST include a list of equipment, and brand, used**

in the manufacturing facility. Nominations without this list will be disqualified.

The *Quality Plant of the Year* will be announced at the 2010 *Quality Measurement Conference*. In addition, each winning plant will be profiled in the March 2010 issue of *Quality Magazine*. The winning plants must be available for interviews and photographs in December 2009.

An official nomination form must be filled out and returned to *Quality Magazine* by November 2, 2009. All nominations will be evaluated by a review board of quality and manufacturing experts. The winning plants will receive notification in December 2009.

Please use the attached nomination form. An online version is available at www.qualitymag.com.
